

Park & Marine Wireless Networks

Press Release.....

October 2006

Park & Marine Wireless Networks today announced their largest contract win to date. The Talacre Beach Group signed a contract to cover all five of their parks, Talacre Beach, Seaview, New Pines, Tan Rallt and Brynteg with a Wireless Network to provide Internet Access for their customers.

"We have been considering Internet Access for our customers for some time" commented Greig Petterson, Talacre Beach Group's IT Manager "and we had looked at several companies before finally agreeing a deal with Park & Marine. Their experience in the market really set them apart and we felt very comfortable with the solution they proposed".

"We are very pleased to be working with a group of parks with the stature and history that the Talacre Beach Group have" remarked Peter Mroch of Park & Marine Wireless Networks "they are a forward looking and well respected member of our industry and mark an important step forward for us as a company. We are now looking at what other ways we can help the Talacre Beach Group with Wireless Technology in the form of Security Cameras or Access Control systems for their parks".

The project rollout begins in November with completion expected sometime mid December. During this time, Park & Marine will cover nearly 2,500 units, over five holiday parks, with Internet Access.

ABOUT PARK & MARINE WIRELESS NETWORKS

Park & Marine Wireless Networks was founded in 2005 and is now one of the Europe's leading providers of Outdoor Wireless connectivity solutions to the Leisure and Marine Industries. We specialise in providing, installing and maintaining secure and flexible infrastructure for Internet Connectivity and Security Applications in Caravan Parks, Camping Grounds and Marina's.

Utilizing the latest Wireless Networking technologies, Park & Marine Wireless Networks is able to provide seamless Internet connectivity throughout any site, delivering broadband like connection speeds that are greater than traditional dial-up solutions at a fraction of the cost of using mobile phone networks as well as providing infrastructure for Security Camera's, VoWLAN Telephony and Access Control.

Our Customers benefit directly from this new and exciting technology by enhancing their proposition to their customers and visitors. More information on Park & Marine Wireless Networks is available at www.parkandmarine.com
