

Park & Marine Wireless Networks

Press Release.....

October 2008

CAME Barriers join the Park & Marine stable.

Park & Marine Wireless Networks, Europe's leading provider of Wireless Connectivity solutions, today confirmed that it had signed an agreement to become an approved installer of CAME barriers.

Park & Marine Wireless Networks commented "we are very pleased to have signed an agreement with CAME. They are known for their extensive range of high quality products and innovative use of technology, just like ourselves. CAME engineer reliable, versatile, cutting edge barrier automation systems for commercial installations around the world. Providing high quality automation systems for gates, barriers, doors, parking and access control products". They went on to say "CAME UK is one of the leading companies in the automation market and we are very happy to be part of their network".

Steve Avery, Area Sales Manager of CAME UK had this to say "we really appreciate being involved with Park and Marine and acknowledge their stature in their market as a forward-thinking and progressive company" He further comments "we were also extremely pleased that Park & Marine decided to involve us in the growing development of secure sites throughout the U.K. and we are especially pleased to be able to provide the quality products and service to such a creditable organisation"

ABOUT PARK & MARINE WIRELESS NETWORKS

Park & Marine Wireless Networks was founded in 2005 and is now one of the Europe's leading providers of Outdoor Wireless connectivity solutions to the Leisure and Marine Industries. We specialise in providing, installing and maintaining secure and flexible infrastructure for Internet Connectivity and Security Applications in Caravan Parks, Camping Grounds and Marina's.

Utilizing the latest Wireless Networking technologies, Park & Marine Wireless Networks is able to provide seamless Internet connectivity throughout any site, delivering broadband like connection speeds that are greater than traditional dial-up solutions at a fraction of the cost of using mobile phone networks as well as providing infrastructure for Security Camera's, VoWLAN Telephony and Access Control.

Our Customers benefit directly from this new and exciting technology by enhancing their proposition to their customers and visitors. More information on Park & Marine Wireless Networks is available at www.parkandmarine.com
